EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. B. J. Sadoff on 22 March 2006.

The application has been amended as follows:

In claim 16, line 3, after the phrase, "for placing the", delete the word "analysis".

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 12 July 2004 has been initialed and signed including consideration of FR 2808888.

Allowable Subject Matter

3. Claims 15, 16, 18-24 and 26-28 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Claims 15 and 27 are allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "means for ensuring a constant distance between the lens and the observation face of the plate" as set forth in the claimed combination. Claims 16, 18-24 and 26 are allowable based upon their dependence on claim 15 and claim 28 is allowable based upon its dependence on claim 27.

The prior art of record teaches a device for positioning a plate comprising one or more samples on an observation or analysis device comprising an observation or

Art Unit: 2872

analysis lens of at least part of a sample along an observation axis from an observation face of the plate, and a chassis having a support assembly, wherein this support assembly comprises a first movable frame sliding in a plane perpendicular to the observation axis; a second movable frame supported by the first frame sliding in said plane perpendicular to the observation axis, the first and second frames being movable in a direction perpendicular to the direction in which other frame moves and a third frame supported by the second frame by means used to maintain the third frame blocked in the plane perpendicular to the observation axis, while leaving third frame free to move essentially along the observation axis. However, the prior art of record does not teach a means for ensuring a constant distance between the lens and the observation face of the plate and there is no teaching or motivation to modify this difference as derived.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Alessandro V. Amari whose telephone number is (571) 272-2306. The examiner can normally be reached on Monday-Friday 8:00 AM to 5:30 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Drew Dunn can be reached on (571) 272-2312. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
